# A Frontline Fax For Today's Fast-Moving Businesses

## — The Panafax UF-580 High-Performance Laser Fax

*Now you can enjoy all the performance of a top-end laser fax, without the top-end price. Small enough to fit on your desk, the new UF-580 combines the simplicity of a basic fax machine with the high quality and speed of a laser printer. With its compact laser engine and built-in Super G3 fax, the UF-580 is more than just a true business-level fax. No add-ons or options are required, and it's so easy to use you can start taking advantage of all its powerful features right out of the box.*

## True Business-Quality Fax Transmission

### High-Speed Scanning

Built for true business-level faxing, the UF-580 scans documents quickly at a rate of **3 seconds per page**. In combination with the **30-sheet automatic document feeder**, this makes it possible for you to fax a multi-page document at the touch of a button without having to wait around.

### High-Speed Transmission

As soon as the first page of a document set has been scanned, the UF-580 starts dialing. **Quick Memory Transmission** immediately transmits the scanned data to the destination. Fully compliant with the ITU-T V.34 standard, the UF-580's **33.6 kbps Super G3 fax** modem transmits a full-page image in as few as 3 seconds. Even better, if you're communicating with another Panafax, exclusive **Super Quick Handshaking** kicks in, dramatically reducing the actual time required for the two faxes to exchange information.

# Energy Savings & Reliability, With Easy Maintenance

## Comprehensive Operation

You can store up to 132 phone numbers. Thanks to a full **QWERTY** keypad on the front panel, you can register the station name easily and quickly.

## Ultra-Low Power Consumption

Thanks to our **Energy Saver Technology**, the UF-580's power consumption is reduced to an incredible 2.4 Wh in the sleep mode.

As an Energy Star® Partner, Panasonic has determined that this product meets the Energy Star® Guidelines for energy efficiency

## Flash Memory/ Expandable Up To 760 Pages\*<sup>1</sup>

The document flash memory retains image and fax data even during power blackouts or brownouts. Once power is restored, the UF-580 will resume all pending files, giving you worry-free fax transmission. The already high-volume **2 MB standard memory** can hold up to **120 pages**\*<sup>1</sup>. Optional **2\*/4\*/8\* MB** flash memory cards allow capacity to be expanded to **280, 440, or even 760 pages**\*<sup>1</sup> to ensure smooth, continuous operation no matter how large the volume of documents being received.

\*<sup>1</sup> Based on ITU-T image No. 1 scanned in standard mode.

\*<sup>2</sup> Not available in some countries.

## All-In-One Print Cartridge

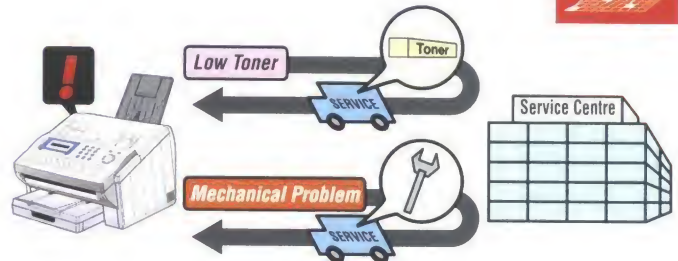

Featuring an **all-in-one cartridge** that includes toner, developer, and drum for quicker replacement, this long-life cartridge simplifies maintenance and has a service life of approximately 7,500 pages\*<sup>3</sup>.

\*<sup>3</sup> Based on ITU-T image No. 1 scanned in multiple copy mode. Yield may vary according to operating conditions and environment where the machine is installed.

## Extended Reliability

With **Check & Call**\*<sup>4</sup>, the UF-580 automatically reports low toner status and certain mechanical problems to a service centre, while the **Remote Diagnostic System**\*<sup>4</sup> enables our expert technicians to quickly locate any problems via a telephone line and provide you with a solution.

\*<sup>4</sup> Not available in some countries.

\*1 Panafax proprietary features work only with selected Panafax machines.

\*2 Not available in some countries.

\*3 Based on ITU-T Image No. 1 scanned in multiple copy mode. Yield may vary according to operating conditions and environment where the machine is installed.

\*4 In multiple copy mode excluding the first copy.

\*5 Transmission time applies to memory transmission of text data using only ITU-T Image No. 1 between the same models at maximum modem speed. Transmission time may vary in actual usage. Usually public telephone lines can only support communications speeds of 28.8 kbps or lower. Via PBX, transmission speed may fall back to a lower speed.

\*6 Interpolated resolution (Optical Resolution: 8 dots/mm x 15.4 lines/mm)

\*7 Scanning speed applies to the feeding process from the top to the end of a single page test chart. The time for the feeding process does not include the time that it takes for the top edge of the page to reach the scanning point and page ejection. Time for entire storing process is not applied.

\*8 Based on ITU-T Image No. 1 scanned in Standard mode.

\*9 Dimensions and weight are approximate.

Super G3 is the classification given to a type of facsimile that conforms to the 33.6 kbps transmission method standardised in accordance with ITU-T V.34 recommendations.
